

23709 Electric Valve

A.  Pull the waste tank out of the Cassette toilet by lifting up the yellow clip.

B.  Inside view, part is assembled with 4 screws (2 in front, 2 at the back).

C.  This bracket is 3x assembled around the toilet bowl. Each bracket has two screws.

For bracket nr. 3, we advise you to use a mirror as the bracket is very difficult to see.

D.  When all the parts are unscrewed, the toilet bowl can be taken off.  Looking into the toilet bowl, the electric valve can be found.

E.  By taking out the vacuum breaker it is easier to replace the electric valve. Press against upstanding rib (1) and the part can be taken out.

F.  Make the electric valve on both sides loose from the tubes and, pull both connectors loose.
 1. Can be pulled off
 2. Unscrew the hose barb
 3. Can be pulled off

G.  Replace electric valve.
 1. Screw hose barb onto the electric valve
 2. Push water tube onto the electric valve
 3. Press both connectors onto the electric valve.

H.  Place vacuum breaker back into position the following way. Place the opening around the screw (1) and press the other side in (2).

I.  Place complete water tube back into the toilet bowl and, place toilet bowl back in position.

J.  Screw the 3 brackets back around the toilet bowl.

K.  Screw both brackets back into position. Place waste tank back into the toilet.
 Note : Bracket with the magnet in it, has to be placed in the front.

1. 23721 Lipseal Cassette C200

- A. Remove sliding cover and 2 screw covers.
Note: Lever off gently screw covers located on either side of the seal cover.

- B. Unscrew the 8 screws on the seal cover and, take the seal cover off.

- C. Place new lipseal on the waste tank.
Note: Thinner flange has to face downwards towards the blade.

- D. Screw seal cover back onto the waste tank and press both screw covers back on the seal cover.

1. 23721 Lipseal Cassette C2/C3/C4 (Toilets produced after 15 June 2000)

- A. Remove the sliding cover and unscrew the 8 screws on the seal cover.

- B. Place new lipseal on the waste tank.
Note: Thinner flange has to face downwards towards the blade.

- C. Screw seal cover back onto the waste tank.

Leaflet no. 23765/062001

23722-74 Automatic vent

- A.

- B. Hold the waste tank in the same position as on photo A, turn the automatic vent to the left and take it out.

- C. Place new automatic vent in the waste tank and turn it to the right to lock it in the waste tank.

Leaflet no. 23767/092001

THETFORD

23726 FLOAT ARM HT C-200

23847 SC234/C200 Blade mechanism

- A. Remove sliding cover and 2 screw covers.
Note: Lever off gently screw covers located on either side of the seal cover.

- B. Unscrew the 8 screws on the seal cover and, take the seal cover off.

General mechanism info:

the blade is pressed into the blade arm on the inside. Do NOT remove the blade arm when changing the blade.

- C. Pull the blade gently out of the blade arm.
Note: the blade is pressed into the blade arm.

- D. Push the blade arm a little bit up and press the new blade gently in the hole of the blade arm. Open and close the blade a few times, to ensure a good operation of the mechanism.

- E. Place the lipseal on the waste tank.
Note: Thinner flange has to face downwards towards the blade.

- F. Screw seal cover back onto the waste tank and press both screw covers back on the seal cover.

- G. Place sliding cover back on its place. Make sure that the two arrows are pointed to each other.
